

MUHAMMAD SULEMAN

Frontend Developer

+92-336-058-9167 | sulemanefc@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Islamabad, Pakistan

PROFESSIONAL SUMMARY

Frontend Developer specialising in React.js, Next.js and TypeScript, building production interfaces for healthcare, e-commerce, SaaS and marketplace products. Sole frontend developer on a live multi-module clinical CMS, and the builder of scroll-driven 3D marketing sites with GSAP, Three.js and Framer Motion. Strong on component architecture, state management and API integration, with enough backend depth to debug across the stack instead of handing problems over.

PROFESSIONAL EXPERIENCE

Frontend Developer / Software Engineer

Codbeyon, Islamabad | June 2025 – Present

- Develop and maintain 5+ production web applications in React.js, Next.js, TypeScript and REST APIs across healthcare, SaaS, e-commerce and marketplace domains
- Sole frontend developer on a production Diagnostic Center Management System spanning 14 dashboard modules, delivering the component architecture, state layer and role-scoped navigation end to end
- Built a car lease and purchase marketplace with role-based dashboards, real-time offer management and multi-step workflows
- Maintain Rahva Raamat, a 4-site Estonian e-commerce brand, shipping features and performance improvements without disrupting live traffic

Solution Engineer

Phebsoft, Islamabad | Nov 2024 – Mar 2025

- Delivered 20+ API integrations across Shopify, QuickBooks, WooCommerce, Xero, HubSpot and Salesforce
- Worked extensively with API contracts, authentication and data mapping, strengthening frontend-backend integration expertise
- Built reliable automation workflows that streamlined data synchronization across multiple business platforms

Web Developer Intern

Bitsol Technologies, Islamabad | Aug 2023 – Sep 2023

- Built responsive web applications using React.js, TypeScript and Material UI
- Developed reusable UI components following clean architecture and responsive design principles
- Collaborated with senior developers to deliver maintainable, cross-browser compatible frontend solutions

SELECTED PROJECTS

MatchGate — ATS Hiring Platform (Solo) | Next.js, Golang, PostgreSQL, Supabase · [Code](#)

- Built the entire frontend solo, from job listing UI to an embeddable iframe hiring panel that lets any company add a working hiring flow with zero backend work on their end
- Designed a candidate scoring dashboard surfacing 0–100% match breakdowns, replacing black-box ATS filtering with a transparent, auditable score

Diagnostic Center Management System (Solo · Production) | Next.js 16, React 19, TypeScript, Zustand, React Hook Form, Recharts

- Sole frontend developer on a live clinical platform of 14 dashboard modules built from 120+ React components, with role-scoped navigation for owners, branch managers and receptionists
- Built a configurable report builder whose form schema is driven by per-category column configs and dynamic test parameters, letting staff define new test layouts without a code change, then render them to PDF in-browser via jsPDF and html2canvas
- Engineered persistent multi-step workflows in Zustand with React Hook Form and Zod validation, holding state across navigation and reloads to eliminate data loss in long clinical and billing sessions

Car Lease / Purchase Negotiation Marketplace | Next.js, TypeScript

- Built real-time negotiation flows connecting customers and dealers with live offer-comparison views, and dynamic form flows that adapt to purchase vs. lease paths in a single guided flow

Niche Scout — Product Research Dashboard | Next.js 16, React 19, Recharts, Tailwind · [Code](#) · [Live](#)

- Dashboard for a product-sourcing pipeline: filterable run views, per-product score breakdowns and Recharts visualisations over a Supabase-backed dataset

Suppway — Gym E-Commerce Storefront | Next.js 15, React 19, GSAP, Zustand, react-hook-form, Zod · [Code](#) · [Live](#)

- Built the storefront UI: GSAP section reveals, an animated particle-text headline and an interactive discount wheel, with a Zustand cart store and react-hook-form + Zod forms sharing one validation schema with the server
- Five switchable themes emitted server-side as scoped CSS variables — no client JavaScript and no flash of unstyled content — and hero effects that fall back to a single static frame under prefers-reduced-motion

LinkedIn Lead Generator Chrome Extension | HTML, CSS, JavaScript, Chrome Extension API

- Built a scraper extension that pulls structured lead data directly from LinkedIn profiles and exports clean CSV, plugging into sales prospecting pipelines with zero manual reformatting

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML5, CSS3, SQL

Frameworks: React, Next.js (App Router, SSG/ISR, Server Actions), React Native, Expo, Capacitor, PWA (Serwist)

State Management: Redux Toolkit, Zustand, React Context API

Styling & Design Systems: Tailwind CSS, SCSS/SASS, Material UI, Storybook, design tokens, responsive & accessible UI

Motion & Animation: GSAP (ScrollTrigger), Framer Motion, Three.js, CSS transforms, reduced-motion support

Testing & Quality: Jest, React Testing Library, Playwright, ESLint, TypeScript strict mode

Backend & Data: Node.js, Golang, REST APIs, GraphQL, PostgreSQL, Supabase, Firebase

Auth & Payments: NextAuth, JWT, Zod, Stripe

Tooling: Git, GitHub Actions, Turborepo, Vercel, Postman, Figma, Supabase Studio

AI-Assisted Development: Cursor, Claude (tool use & MCP), MCP servers, custom agent skills

EDUCATION

Sep 2020 – Feb 2024

BS Computer Science

GPA 3.1/4.0

Institute of Space & Technology, Islamabad

ACHIEVEMENTS

- 1st Place — Speed Programming Competition, IST (2022)
- 2nd Place — University Quiz Competition, IST (2022)
- Certified — MERN Stack, SimpliLearn
